

It's All About Selling Cars

www.itsallaboutsellingcars.com

We know who's in the market to buy a vehicle every day, now you can too.

“Every day the TriggerLead process

identifies the buyers in your market.”

- Every single day we know exactly who's had their bureau pulled to buy a vehicle?
- That list is scrubbed against our lending requirements and your preferred credit range.
- We send a firm offer of credit as a live check in your dealership's name the very next day.
- Each consumer can write an amount between \$7,500 and \$40,000.
- Where available we provide phone numbers so you can call them immediately while they're HOT!!!
- Target your specific market or an area you'd like to draw customers from.
- Markets are exclusive and going fast!

The **TriggerLeads** (patent pending) process is an enhanced pre-screen firm offer of auto credit via a 'Live Check' from Direct Lending Source based on our lending criteria, made payable to your dealership.

Virtual Lending Source's unique ability to identify qualified prospects precisely when they're in the market for a vehicle, will raise your response rates, and help you sell more cars.

As if that wasn't enough, where available, we provide you with their phone number and the proper way to contact them immediately while they're **hot!**

There has never been an opportunity like this! Markets are **exclusive** and going fast!
